

Course Introduction

Module 1

Server Roles and Initial Configuration Tasks

Lesson 1: Application Server Roles

Web Server
Windows Media Services
Windows SharePoint Services
UDDI Services

Lesson 2: Application Server Features

Application Server Features
Initial Configuration
Server Manager

Lesson 3: Windows Server as an Application Server

Windows Server as an Application Server
Demo - Initial Configuration Tasks
Module 1 Review

Module 2

Overview of IIS 7.0 Application Server

Lesson 1: Review of IIS 6.0

IIS 6.0 Pillars

Lesson 2: Key Improvements in IIS 7.0

IIS 7.0 Pillars
Modular Deployment
IIS 7.0 Request Processing
IIS 7.0 ASP.NET Integration
Replicate Content and Configuration
Centralize Content and Configuration
Industry Standards Support

Lesson 3: IIS 7.0 Configuration System

New IIS 7.0 Configuration System
Hierarchy of Configuration Files
Demo - Install IIS

[BACK](#)

Demo - Web App
Module 2 Review

Module 3

Managing Web Applications with IIS 7.0

Lesson 1: Managing IIS 7.0

IIS Manager
Appcmd.exe
Compatibility

Lesson 2: Using Hierarchical Configuration Settings

IIS 7.0 Configuration Concepts
Section Groups
Sections
Elements
Collections
Attributes
Locations
Hierarchy of Configuration Files
IIS 7.0 Configuration File Schema
Schema Files
Example IIS 7.0 Schema Definition
The Schema and

Lesson 3: Delegating Configuration to Non-Administrator Users

Locking Configuration Settings
Default Locking of Sections
Locking Sections
Granular Locking
lockAttributes & lockAllAttributesExcept
lockElements
lockElements add remove clear
lockItem
Locking Summary
IIS Manager and Delegation
IIS 7.0 Programming
Demo - Edit App Host
Demo - Edit Web Config
Demo - Edit Web Config2
Module 3 Review

Module 4

Troubleshooting Web Servers

Lesson 1: Troubleshooting IIS 7.0

Failed Request Tracing
Runtime Control and Status API
Failed Request Event Buffering
Troubleshooting in IIS 7.0: Custom Errors

Lesson 2: Using the Runtime Control and Status API

Runtime Status and Control API (RCSA)
RCSA Goals
RCSA Objects: IRCSA_WAS
RCSA Objects: IRCSA_W3SVC
RCSA Example Objects and Data

Lesson 3: Using Automatic Failed Request Tracing

How the Tracing Infrastructure Works
Automatic Failed Request Tracing
Definitions in applicationHost.config
Failure Definitions in web.config
Enabling ASPX Page Event Tracing

Lesson 4: Adding Trace Events to Managed Modules

Unified Web Platform Tracing
Demo - SimpleTrace
Demo - Worker Trace
Demo - Monitor API
Demo - ASPX Trace
Define the Trace Event Listener
Define a Trace Switch
Define a Trace Source for a Module
Use Trace Source in Module Code
Configure FREB to Use ASPNET Provider
Module 4 Review

Module 5

Introduction to the Windows SharePoint Services 3.0 Platform

Lesson 1: Overview of Windows SharePoint Services 3.0

Common Collaborative Challenges
Let's Talk: Collaboration Problems
Windows SharePoint Services Solutions

Lesson 2: Collaborative Technologies with WSS

Document Storage and Management
Collaboration
Information Management and Communication

Lesson 3: Planning the WSS 3.0 Environment

Determining Organizational Needs
Determining User Needs
Determining Site Hierarchy
Planning Site Creation, Maintenance, and Security
Planning Server Requirements and Topologies

Lesson 4: Installing and Configuring WSS 3.0

Performing a Clean Installation of WSS 3.0
Demo - Setup WSS Admin
Demo - Email Config
Demo - Site Collection
Steps to Configure Sites
Module 5 Review

Module 6

Configuring and Managing Windows SharePoint Services 3.0

Lesson 1: Creating and Configuring Sites

Considerations for Creating a Web Application
Considerations for Creating a Site Collection
Starting the WSS Search Service
Alternate Access Mappings

Lesson 2: Managing Windows SharePoint Services 3.0

Steps for WSS 3.0 Site Management
Demo - WSS Config
Demo - Manage WSS Site
Demo - Add User
Demo - Usage
Best Practices for Checking the WSS 3.0 Servers
Managing Server Scalability
Module 6 Review

Module 7

Configuring Terminal Services

Lesson 1: Terminal Services Overview Terminal Services

New Features

x64 and Terminal Services
TS and the x64 Architecture

Lesson 2: Terminal Services Core Functionality

Remote Desktop Connection 6.0
Remote Desktop Connection Display
Device Redirection
Single Sign-On

Lesson 3: Terminal Services Web Access

TS Web Access Overview
New Functionality with TS Web Access

Lesson 4: Terminal Services Licensing

Terminal Services Licensing
Demo - Install TS
Demo - Setup RDP
Demo - TS WebApp
Demo - TS App Word
Module 7 Review

Module 8

Managing Terminal Services

Lesson 1: Terminal Services RemoteApp Programs

Windows Server 2008 TS RemoteApp Programs
Key Scenarios for Using TS RemoteApp
Programs
Configuring TS RemoteApp Programs
Discussion: TS RemoteApp Programs

Lesson 2: Terminal Services Gateway

Terminal Services Gateway Overview
TS Gateway Remote Access
Configuring TS Gateway
Connection Authorization Policies
Resource Authorization Policies

Lesson 3: Managing Terminal Services

Terminal Server Configuration Console
Terminal Services Gateway Management
Terminal Services and WSRM
Demo - TS Web APP
Demo - CAP RAP
Demo - Managing TS
Demo - WSRM
Module 8 Review
Course Closure
